COM4IT has a status of Citrix Access Essentials® Partner Solution Advisor

COM4IT has a status of Citrix Access Essentials® Partner Solution Advisor. Citrix Access Essentials® is an economical and secure access to applications and critical information from any place, any time, with the use of any equipment, in any network. Simple, secure access of remote offices and mobile employees to information and applications is an issue of decisive significance for a company which wishes for successful development. Making use of proven technologies developed together by Citrix and Microsoft companies, Citrix Access Essentials® software allows organizations such as yours to render information and applications of the company accessible for users in any workplace, any time it is necessary – based on IT resources and at reasonable price. Depending on your company's demand, Citrix Access Essentials® can be implemented even for only five users, and additional licenses for following five-person groups are available up to the maximal number of 75 users. It is a calibrated solution which can grow together with your company. More information on the topic of Citrix Access Essentials®,
